

## Government

I used to be a hard core anarchist  
Studying Society taught guiding hand turned fist.

It's not a bad thing when used the right way  
We need rules in the game of Life that we play.

Incompatible with individual liberty was my cry  
Seeing what some do with that answers the question why.

Seeking the reason it does bad things today,  
Corruption by power and greed make it that way.

It's meant to guide and teach us to share  
It spoils in the hands of fools who don't care.

Cheating and stealing by the mind that is bent  
"I'll make it my way to give me free rent".

It seem to be hopeless gone so far astray  
Controlled by a few who don't believe in equal pay.

Politics meant to serve are a race for personal glory  
Scruples have no meaning the job goes to the one most whorey.

Changing the way of mankind is imminent  
When BLitTeR does its job it will fix the Government.
