

## Imagine That

Paradise is here in the physical world covered up by a smoke screen of Society. Paradise, the kingdom of God, the Garden of Eden on Earth, is ours to claim with a simple change of “direction”.

The key is the “direction” of Society, the direction is “into the dirt” (physical world or Existence). We’ve been “composting”, everything that we have added to the dirt of Earth with our power of creation is the nutrients we need to grow into our Godly form.

The smoke screen kept our attention directed for interaction with the dirt in “composting”, instead of gazing at the stars. The development of resources and technology is given preference over individual lives for the development of sustainable “Life of earth”.

“Life of earth”, needs a place to sustain Life, the physical world, we can pick it up and take it or go there and make it, job well done.

Imagine that it’s time to change “direction”? . . . Ahh, yuh.

I’m talking about changing the “direction” of Society from “into the dirt” to “being OF God”, please quit crying about spilt milk. I’m talking about something the magnitude and importance of Creation, not politics. I’m talking about the driving Life force on Earth and changing the physical progress of Society to be towards its Godly potential. We have the technology and resources to feed and house the world and they are wasted in the “direction” of “into the dirt”.

Any life, “matters more”, than any thing. Anybody will agree with you on that, if you put their life in the place of “matters more”. The way it is, things “matter more” than life. As “directed” by Rule a tiny rock of diamond or gold can buy a life.

“Direction” is the flow of force that creates our Existence here and now. A flow of force, like water, like wind and like electricity, once identified and studied can be harnessed and used to the benefit of mankind.

Before being identified the force is Unknown, an awesome power only appeared in the mind with rituals and prayer. I have identified the force, “direction”, in Society. Before, it was Unknown. It is called God, It is denied and It is accepted as an inevitable uncontrollable, as “were” water, wind and electricity.

This is new knowledge about a force; it may seem like science fiction but is about Real Life.

It is an element of Society, the creation of man, including everything on Earth resulting from our interaction with creative intelligence. Our creation, our “common” mind reality is the ultimate achievement of God in the physical world. It is “directed” into the physical world for creation to sustain Life. Mission accomplished, we will progress no further, we are stagnate and cannibalizing.

The element of Society that is “direction” is contributed by each and every member of Society. It is set to go forward, into physical creation, From God. We can change it to be OF God.
