

The Animal Nature – Evil

I'm talking about all the nasty in the world, the root of every wrong done. Every abuse to Life is done by the Animal Nature.

The Animal Nature is “direction” into the physical world of creation with progress advanced to the level of intelligence. The progression of here and now intelligence, before the higher level of Spiritual is Animal Nature. When Animal Nature maxed out due to the restrictions of the physical world, it opened the next level of Spiritual and birthed free will.

Free will is contained in the physical world and is the ability to affect change in that which has been created in the natural progression of “direction”; it is the ultimate of Animal Nature. The fact that it can alter what has been produced in the natural progression (balance) affects the physical world unnaturally (imbalance). That imbalance causes the things we blame on Evil.

Animal Nature is for progressing into the physical world, the intelligence of the animal. To continue Life progress in the physical world is the goal of the intelligence, survival above all is the rule. Right and wrong or good and evil do not exist at this level. Animal Nature, the maximum of intelligence contained in the physical world is restricted to understanding of physical wants and needs of its own particular element and cannibalizes other elements to survive, nothing good or evil.

Mankind is of the Animal Nature, an animal, not a Spiritual being. All religions teach that the purpose of mankind's existence is to become Spiritual beings. All religion teaches of right and wrong or good and evil so that mankind can progress to the level of Spiritual. The Bible says mankind is born a sinner and teaches to overcome the inherent evil, Animal Nature.

We have access to the Spiritual because it is the balancing effect of free will. It is knowledge of the “perfect balance” that we affect with our free will. With Spiritual knowledge we see and determine Evil in the Animal Nature.

With BLitTeR we are going to shift the “direction” of Animal Nature with Spiritual knowledge. A “common” connection (a single word) for the Feeling of that knowledge will make the change.

BLitTeR, “acknowledge the Feeling”.
